

Setting up an iPhone

Manual Configuration

To set up your 20i mailbox on an Apple iPhone or iPad, you need to:

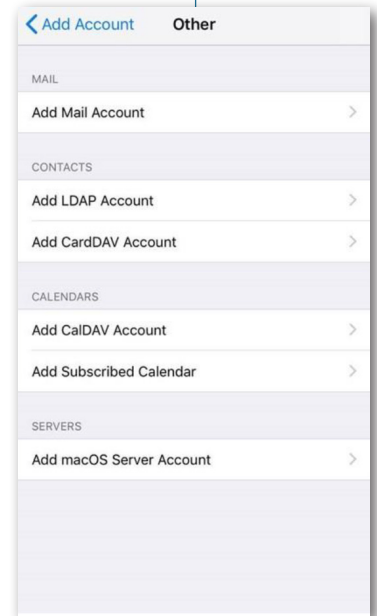

Step One

- Head to the **Settings** icon and locate the **Mail** option.
- Go to **Accounts**.
- Then select **'Add Account'**.
- Select **Other** from this list.

Step Two

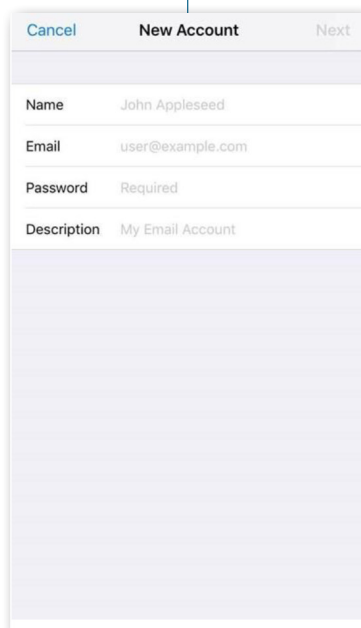

- Select **Add Mail Account**.

Step Three

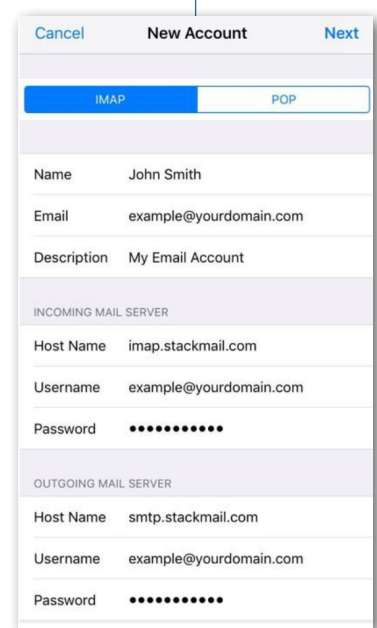

Input the information requested:

- **Name:**
Anything
- **Email:**
example@yourdomain.com
- **Password:**
Mailbox Password
- **Description:**
Work, Business...etc

Step Four

- **IMAP:**
Incoming Mail Server
- **Host Name:**
imap.visionict.host
- **Username:**
example@yourdomain.com
- **Password:**
Mailbox Password
- **Host Name:**
smtp.visionict.host
- **Username:**
example@yourdomain.com
- **Password:**
Mailbox Password

and finally...

Select the mail account and go into the **Outgoing Mail Server settings**.
Select **Primary Server**, make sure **SSL is switched on** and the port is set to **587**.
